

Workshop 1ZK30

Week 3 – Idea generation

DESIGN THINKING

RECAP

Workshop 1 – Team & Problem Exploration

- You formed teams and you defined your strengths, roles & rules
- You explored neighborhoods (data detective, journalist, anthropologist) and collected first insights

Workshop 2 – Problem Identification

- You analyzed interviews, observations, and archival data
- You developed personas and crafted problem statements based on your data

Together, these outputs define WHO you design for, WHAT problem matters and WHICH Team strengths/means you have to provide a solution

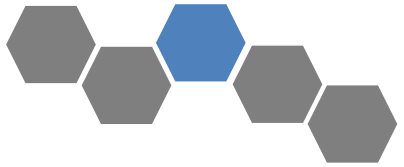

➢ This is the foundation for Workshop 3: Ideation – generating solutions.

DESIGN THINKING

Ideate

The focus is on generating ideas. You translate problems into solutions. Find a variety of different ideas that go beyond obvious solutions to the problem.

- **Creativity:** Combine (un)conscious with rational thoughts and ideas
- **Group synergies:** Use the group by building on the ideas of others
- Separate the generation of ideas from their evaluation and let creativity run free

OBJECTIVES OF WORKSHOP 3

1. Generate a wide variety of creative ideas based on the problem statement from Workshop 2.

2. Apply the Design Studio method and generate as many ideas as possible (goal: 50 or more)

3. Select 3 promising ideas to take forward.

4. Document ideas and complete an Idea Canvas for the current favorite idea.

AGENDA

1. Introduction: Creativity & Design Studio (ideation) rules
2. Design Studio Ideation Round 1 (individual sketching, presentation & feedback)
3. Design Studio Ideation Round 2 (individual sketching & iteration, presentation & feedback)
4. Clustering & Voting
5. Group Discussion & Selection (3 ideas)
6. Idea Canvas (favorite idea)
7. Wrap-up & preparation for next workshop

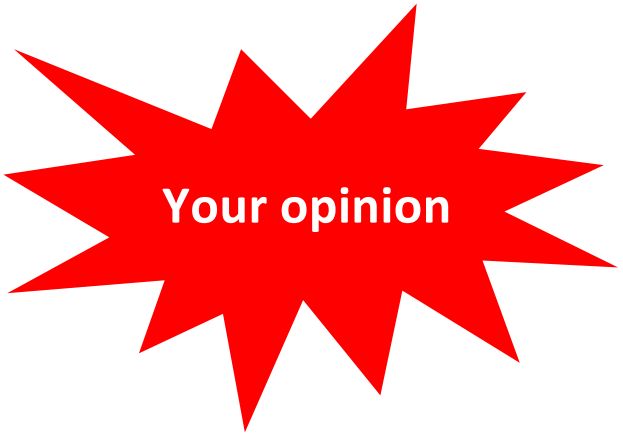

DELIVERABLES AFTER THIS WORKSHOP

Deliverables after this workshop for your team assignment 1

- Take pictures of your output in the workshop! If you repeat the process outside the workshop, document every step of your design studio practice via screenshot or taking pictures and incorporate them in the first assignment
- Prepare a list of 50 ideas and their clustering and include it in the assignment
- Briefly explain the 3 ideas you have chosen to move forward with
- Create an Idea Canvas of your favorite idea (it might still change!)

CREATIVITY

Can every person be creative?

CREATIVITY

Thomas Edison

Genius is 1% inspiration and 99% perspiration.

Linus Pauling

The way to get good ideas is to get lots of ideas, and throw the bad ones away.

Edward de Bono

It is better to have enough ideas for some of them to be wrong, than to be always right by having no ideas at all.

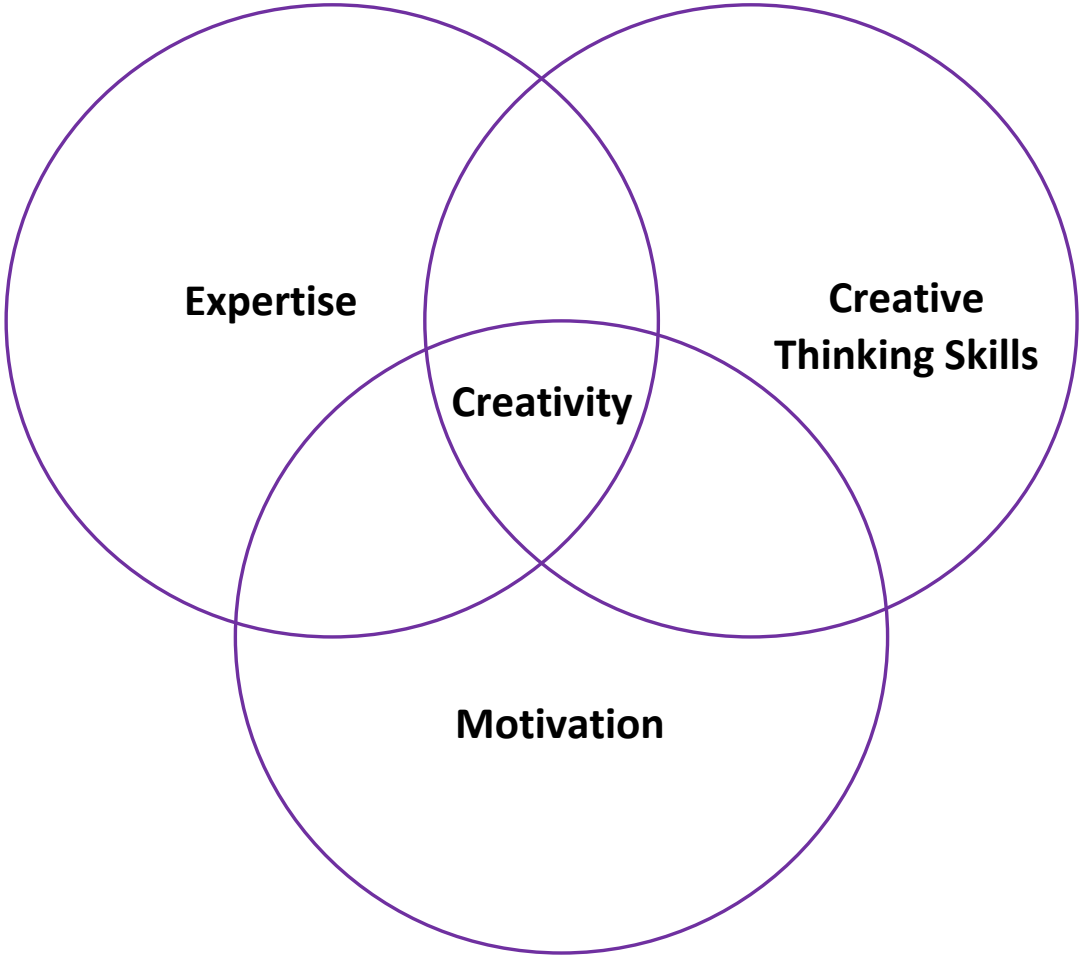

Teresa Amabile

Creativity by individuals and teams is a starting point for innovation; the first is a necessary but not a sufficient condition for the second.

CREATIVITY

Definition of Creativity

- "Production of novel ideas that are useful and appropriate to the situation" (Unsworth 2001)

Guidelines for Creativity

- Don't judge
- Generate lots of ideas
- Use analogies
- Don't be afraid of failure

Environment for Creativity

- Appropriate communication of information
- Personal communication
- Variety of tasks
- Psychological safety

BRAINSTORMING IS RELATIVELY INEFFICIENT

Not Brainstorming

DESIGN STUDIO IS AN EFFICIENT METHOD
