
Workshop series 1ZK30

DESIGN THINKING

DESIGN THINKING

Empathize

Understand the experience, situation, and emotions of the person you are working for

- **Observe** users and their behavior in their daily lives
- **Conduct** interviews and conversations with people. Ask questions like “Why?”
- **Watch and listen**: Ask someone to perform a task and tell them what to do

DESIGN THINKING

Define

Process and consolidate the results to understand the customer's perspective

- **Users:** Develop an understanding of the person you are designing for
- **Needs:** Make a selection of important needs
- **Insights:** Record the insights you have gained and define principles

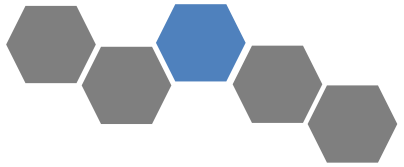

DESIGN THINKING

Ideate

The focus is on generating ideas. You translate problems into solutions. Find a variety of different ideas that go beyond obvious solutions to the problem.

- **Creativity:** Combine (un)conscious with rational thoughts and ideas
- **Group synergies:** Use the group by building on the ideas of others
- Separate the generation of ideas from their evaluation and let creativity run free

DESIGN THINKING

Prototype

A prototype is a simple, inexpensive, and quick way to develop ideas so that you can interact with and experience them.

- **Start building:** Build a low-resolution sketch. It can be a physical object or a digital click dummy (quick & dirty).
- **Storyboard:** Design a scenario in which people can experience the solution in a physical environment.

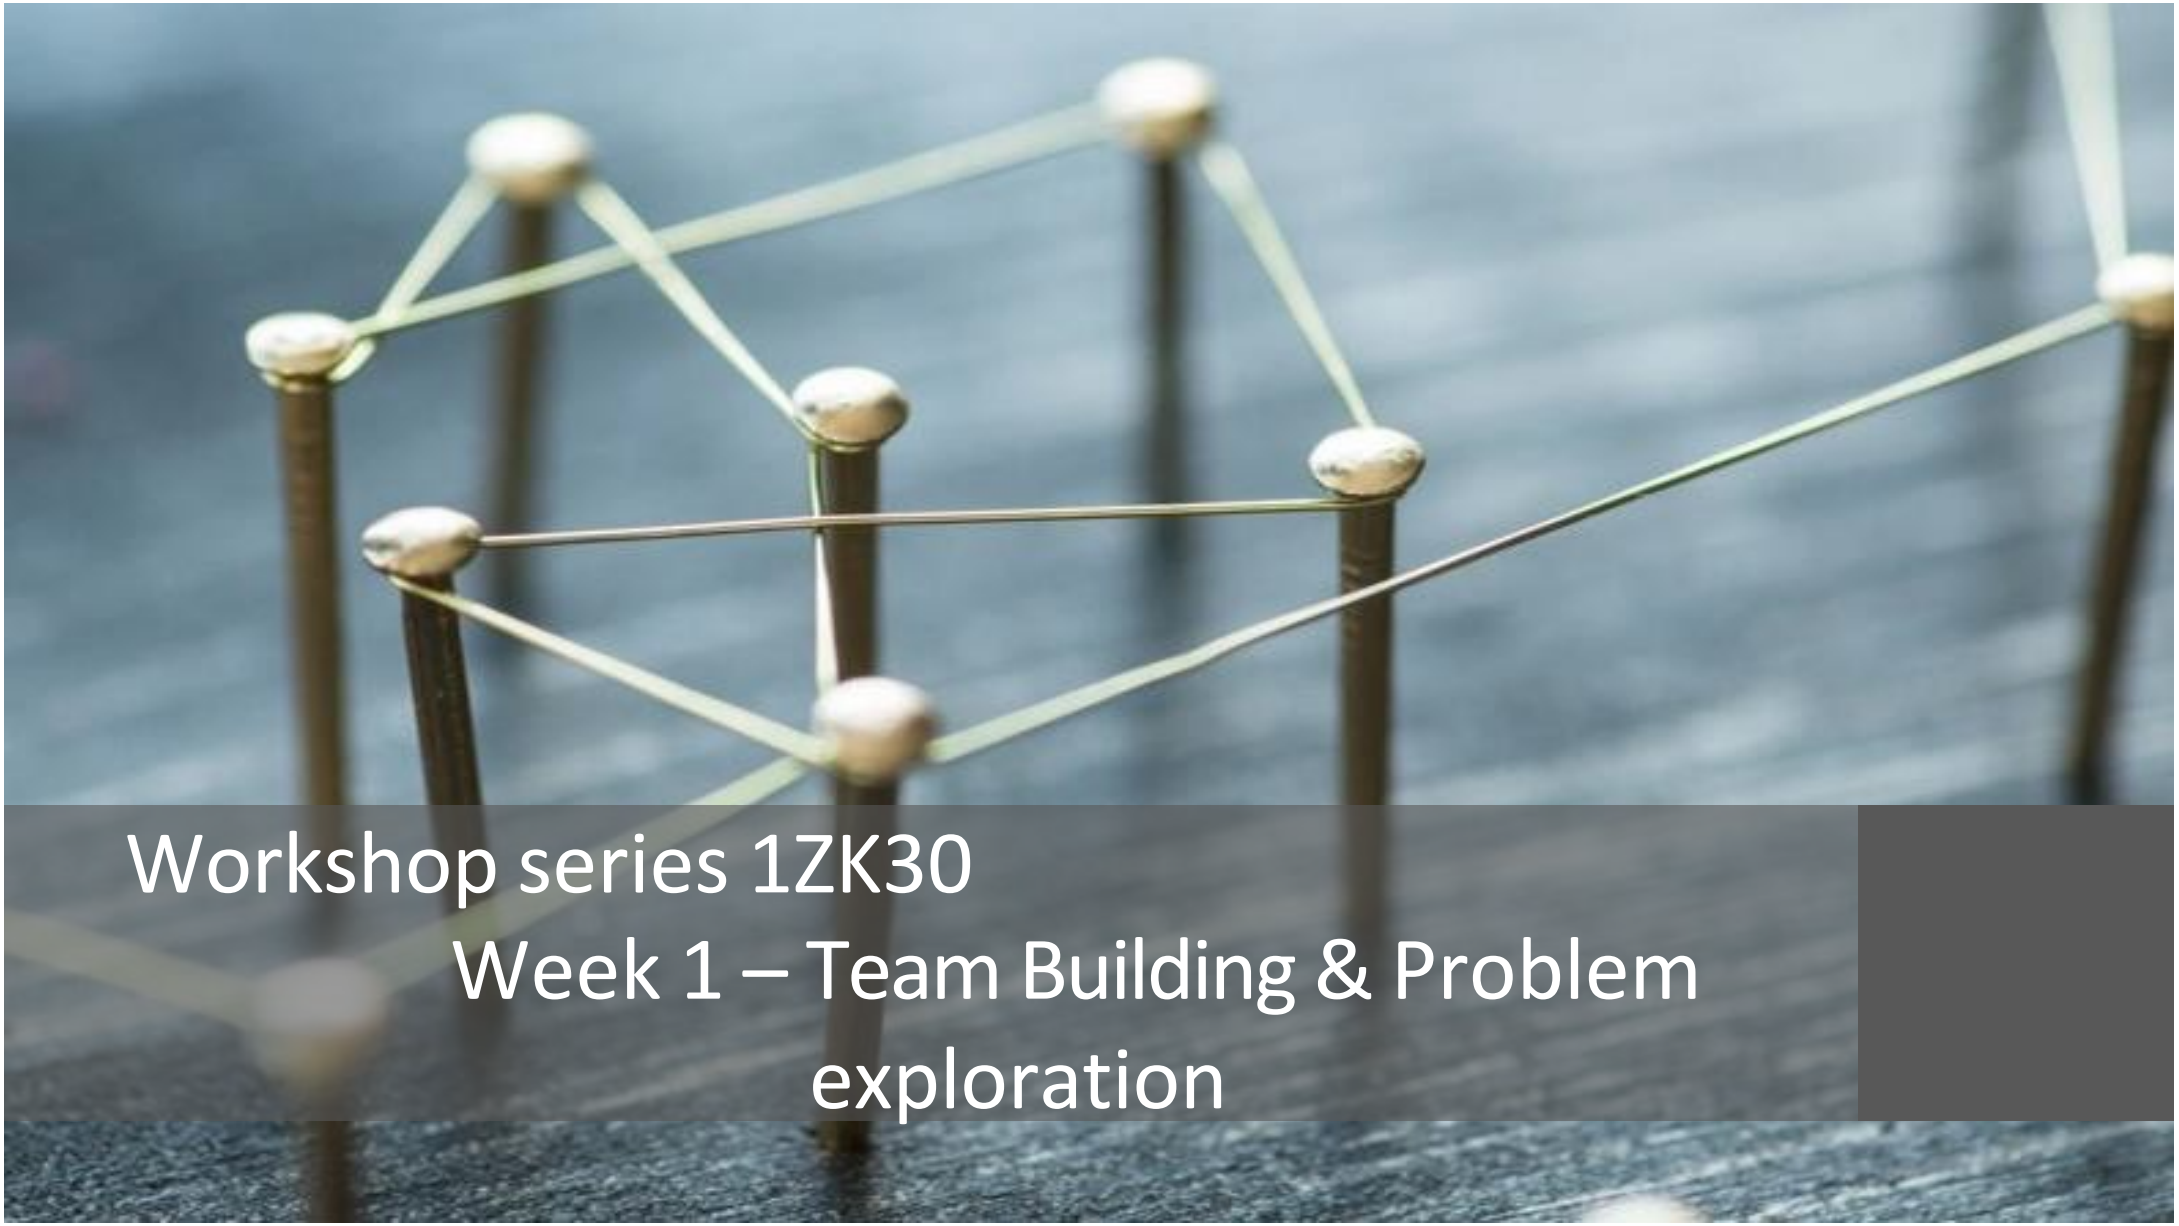

DESIGN THINKING

Test

Ask for feedback on your prototype. Learn about your users, refocus your attention, and refine your prototype.

- **Presentation:** Let people use your prototype. Put it in their hands and listen to them.
- **Create experiences:** Let people talk about their experiences and feelings.

Workshop series 1ZK30

Week 1 – Team Building & Problem exploration

WORKSHOP OBJECTIVES

1. Get to know your team
2. Develop a plan for exploring the challenge

Ground Rules for the Workshop

Stick to time & tasks – we run on a tight schedule.

Trust the process – follow the steps, don't jump ahead.

Focus fully – no phones/laptops unless needed for the task.

Individual task = individual – when asked to work alone, *work silently*.

Group task = group – only discuss once it's time to share.

Ask early – if you don't understand the deliverable, raise your hand before the clock starts.

Respect & listen – value everyone's input, one person speaks at a time.

Have fun & be creative – energy matters!

TEAM BUILDING

7 minutes

00 : 07 : 00

Change Clock Type

Digita

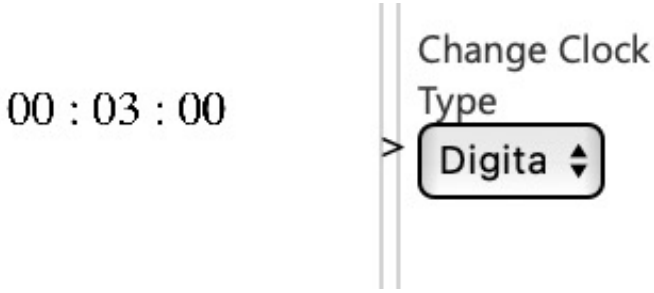

Get to know each other

- Your name
- Where are you from?
- What did you do during the semester break?
- A "fun fact" about you
- Why do you participate in this course?
- Why are you interested in the topic of entrepreneurship?
- Have you already founded a company or are you planning to do so?

TEAM BUILDING

3 minutes

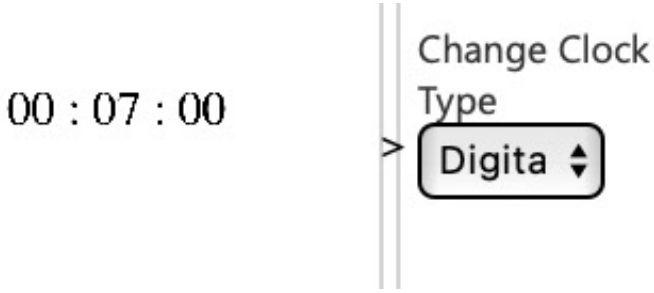

Team strength exercise

- **Strength identification:** Write down individually which strengths and skills you have in relation to entrepreneurship, or at least what you generally like to do
- E.g. creativity, communication, financial knowledge, technical knowledge, organizing skills...

TEAM BUILDING

7 minutes

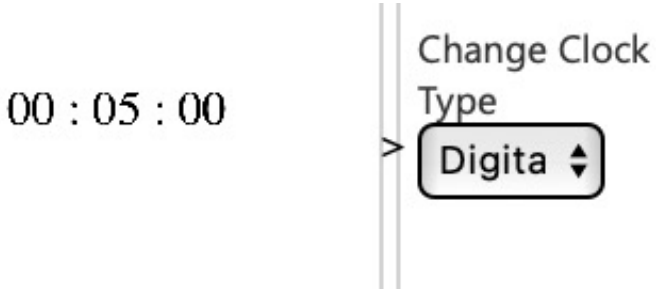

Team strength exercise

- **Strengths presentation:** Present your strengths and possible contributions to the group and explain to your team members how these could be relevant for a startup project
- **Visualize strengths:** Summarize all your team's strengths on your group poster

TEAM BUILDING

5 minutes

Team strength exercise

- **Role identification:** Discuss which roles are important to ensure a successful project in general and creating a new product/service in particular! Summarize the roles on your group poster
- E.g. Coordinator/, Research Lead (user discovery etc.), Prototyping Lead/Designer, Storyteller (Pitch Lead, Visionary, Communication), Documentation and Controlling, etc.

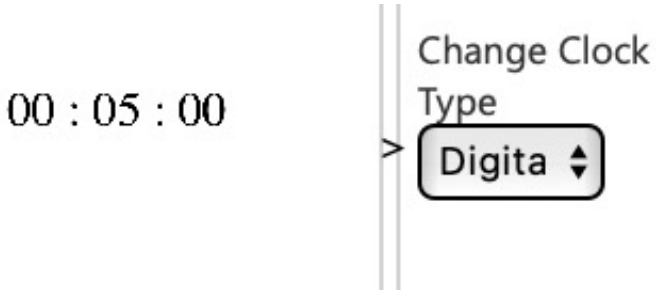

TEAM BUILDING

5 minutes

Team role exercise

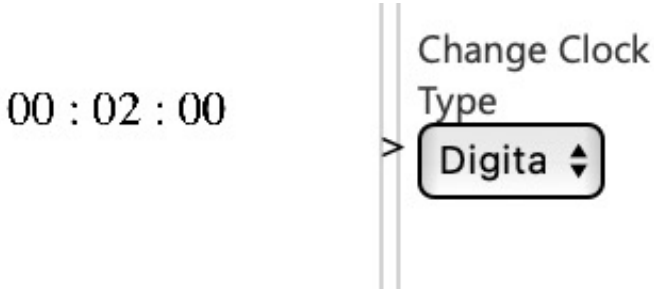

- **Assign roles:** Decide, which role everyone should adopt, based on your individual strengths and possible contributions

TEAM BUILDING

2 minutes

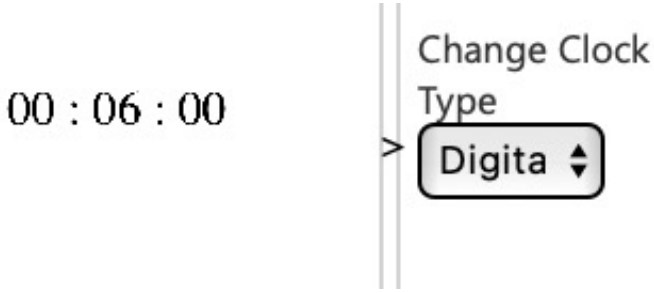

Team rules exercise

- **Expectations:** Write down individually, what expectations from your team members
- **Teamwork:** Write down individually, what makes good teamwork in your opinion

TEAM BUILDING

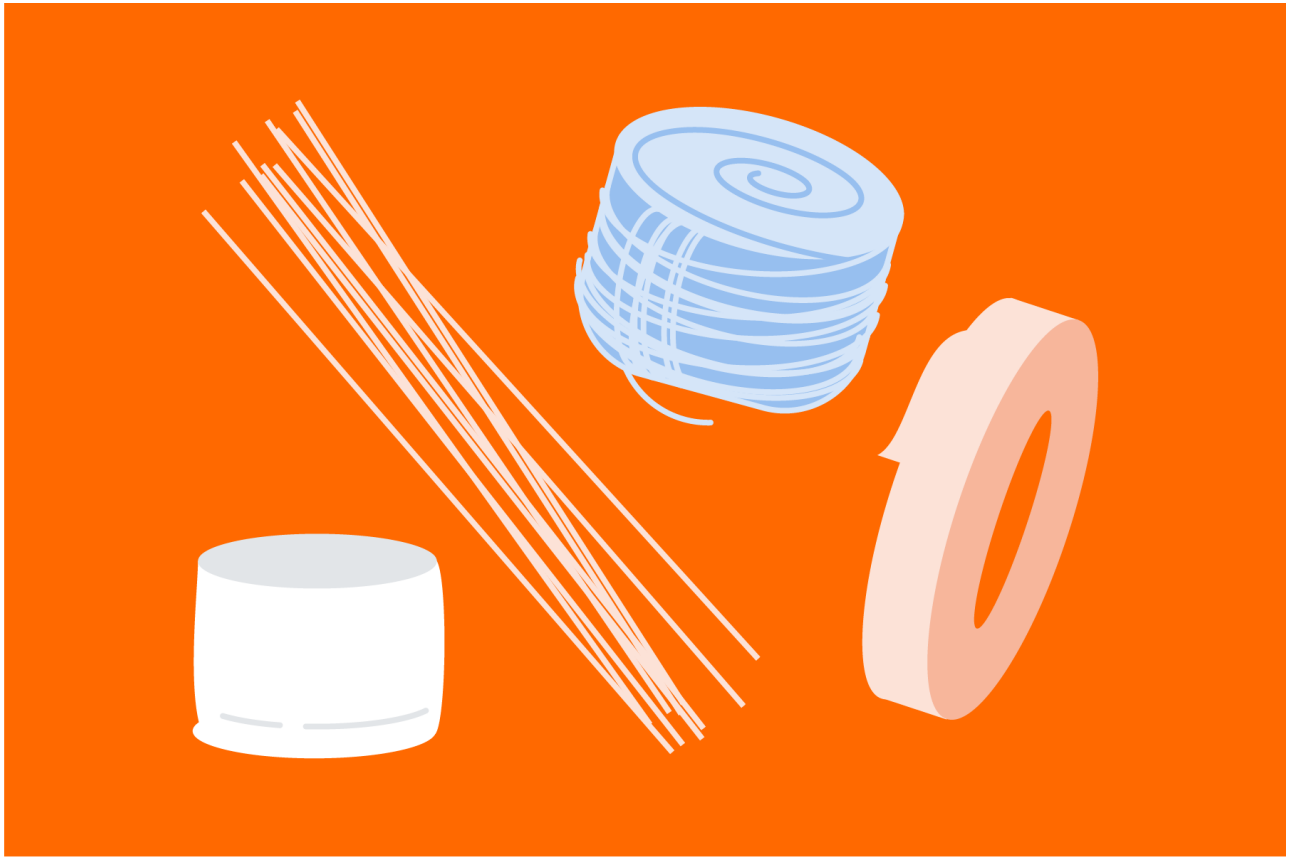

6 minutes

Team rules exercise

- **Expectations and teamwork:** Summarize all your team's expectations and teamwork factors on your group poster
- **Team rules and commitment:** Discuss, what collaboration rules do you want to agree on. Write down these rules and also write down how do you want to ensure everyone follows these rules and is committed to the project?

Marshmallow Challenge

Per team:

- 20 spaghetti
- 1 m of tape
- 1 marshmallow
- **15 minutes**

→ The tallest tower wins!

Source: https://blog.thinkcerca.com/activity-improve-your-schools-decision-making-with-the-marshmallow-challenge

Build a tower, build a team

Video source: https://www.youtube.com/watch?v=H0_yKBitO8M

PROBLEM STATEMENT

Before we can solve a problem, we must define it. A perfect solution to the wrong problem will not work.

A good problem statement is:

- Short, precisely defined, and easy to understand
- People-oriented—i.e., focused on the people you want to help
- Defines the problem precisely
- Open to many different solutions and approaches

What is the problem you are trying to solve?

Questions to help you narrow down your problem:

- Who is involved in and affected by the problem?
- What are the effects of the problem?
- What are the causes of the problem?
- Why is solving the problem important for those affected and for the company?
- Where is the problem located or where does it have an impact?
- When did the problem start?

CHALLENGES IN THE CITY OF EINDHOVEN

Eindhoven has no less than 116 neighbourhoods, and each one has its own peculiarities.

A lot of data on the different neighbourhoods for different themes:

- Culture
- Citizen participation
- Public space and greenery
- Wellbeing and health

PROBLEM EXPLORATION

In order to address the challenge:

- You need to understand the context
- putting the problem in context assists in identifying opportunities
- Without this stage, you can only see one aspect of the problem, and may therefore overlook possible opportunities.

THREE TECHNIQUES FOR PROBLEM EXPLORATION

The Data Detective

The Journalist

The Anthropologist

THE DATA DETECTIVE

- Desk research
- Easy
- Great foundation for future research
- Static
- Not context specific

THE DATA DETECTIVE

- Select a neighborhood, or even a specific street (corner), square, park and theme (Culture, public space and green, health and wellbeing or resident participation)
- Use existing databases to understand the specifics of that location:
  - Consult the resources provided by Eindhoven municipality
  - Complement with other online resources (e.g. google trends, CBS, Statista, Statline, …
- Analyze the data to search for patterns / trends / remarkable insights
- Synthesize your findings from these data sources into clear problem definitions

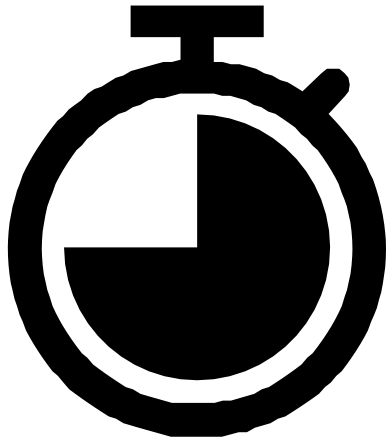

THE DATA DETECTIVE

Take the following 20 minutes to become a detective and delve into the data (Links on canvas)

- Culture: Inwonersenquête 2023 - Cultuur | onderzoek.eindhoven.nl
- Citizin participation: Inwonersenquête 2023 - Inwonersparticipatie | onderzoek.eindhoven.nl
- Public space and greenery: Inwonersenquête 2023 - Openbare ruimte & Groen | onderzoek.eindhoven.nl
- Health and wellbeing: Inwonersenquête 2023 - Welzijn & Gezondheid | onderzoek.eindhoven.nl

Once you have decided on your neighbourhood, reserve your spot (neighborhood) in the google form. Every team should focus on a different neighbourhood!

https://tuenl-my.sharepoint.com/:x:/g/personal/a_s_a_bobelyn_tue_nl/IQDu8peYlQeKQJdov0GhzeYoAdp3xEO0bUQmx94iAub9VbU?e=XEBhg5

20 minutes

THE JOURNALIST

- Interviews
- Easy
- Quick and cheap
- Actual behavior may differ from answers
- People do not always know what they want

THE JOURNALIST

- Listen more than you talk
- Get facts, not opinions
- Ask “why” to get real motivations
- Don’t mention solutions too early
- Always open door at the end
- Follow up

THE JOURNALIST – EMPATHY INTERVIEWS

The aim of the interviews is to **put ourselves in the shoes of potential users**. Once we understand how they think and what motivates them, we can better understand their needs. Based on this**,** we can **develop** the **product or service to solve their problems (pains)**.

Structure:

1. **Warm-up** – build trust (e.g., profession, everyday life)
2. **Main part** – Needs, problems, behavior
3. **Deep dive** – Concrete examples, stories
4. **Conclusion** – wishes, ideas, open questions

Tips for questions:

- **Ask open questions:** "How do you typically deal with XY?"
- **Follow up:** "Why is that? Can you give me an example?"
- **No leading questions:** Don't say, "Do you find that difficult?" Instead, say, "How do you feel about that?"

THE JOURNALIST – EMPATHY INTERVIEWS

Conducting the interview:

- **Duration:** 20–60 minutes
- **Location:** ideally in the users' natural context (or remotely via video)
- **Recording** (with consent) or taking notes (e.g., with a second observer)

After the interview:

1. Note down quotes and observations
2. Identify pain points and needs
3. Recognize recurring patterns
4. Cluster findings (affinity mapping)
5. Create personas and empathy maps (workshop 2)

Do's	Don'ts
• Ask open-ended questions	• Asking leading questions
• Pay attention to nonverbal signals	• Interrupting the interviewee
• Ask for examples	• Using technical jargon
• Allow time for breaks/thinking	• Prematurely generalizing results

THE JOURNALIST

Preparation for Workshop 2: Problem Identification

- Create an interview outline (questions) and plan who to interview, where, and how to convince them – be creative!
- Conduct the interviews (minimum 2 per team member)
- Take notes or record the interviews
- Analyze the interviews and map out the problems, issues and concerns of the interviewees
- Synthesize your findings into problem definitions

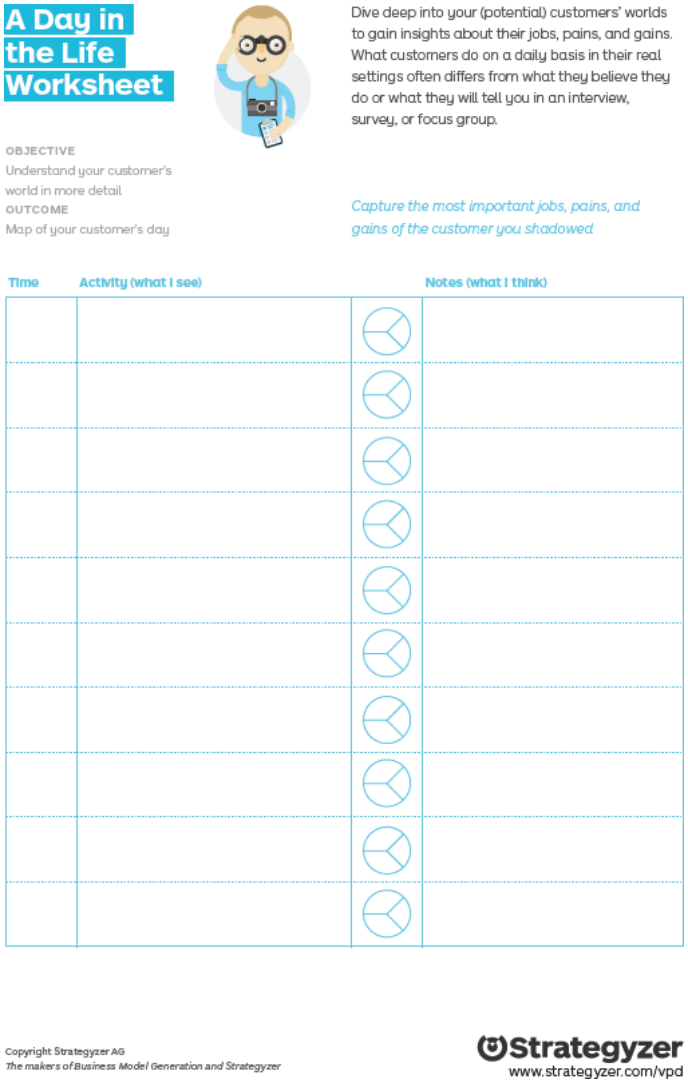

THE ANTHROPOLOGIST

- Unbiased
- Real-world behavior
- Difficult to gain customer insights related to new ideas

THE ANTHROPOLOGIST

- Deep dive into your customer’s worlds
- What they do in daily life differs from what they believe or tell you
- B2C: stay with the familiy, observe shopping behavior, shadowing
- B2B: work alongside / consult

A Day in the Life Worksheet

Dive deep into your (potential) customers' worlds to gain insights about their jobs, pains, and gains. What customers do on a daily basis in their real settings often differs from what they believe they do or what they will tell you in an interview, survey, or focus group.

OBJECTIVE
Understand your customer's world in more detail

OUTCOME
Map of your customer's day

Capture the most important jobs, pains, and gains of the customer you shadowed

Time	Activity (what I see)		Notes (what I think)

Copyright Strategyzer AG
The makers of Business Model Generation and Strategyzer

Strategyzer
www.strategyzer.com/vpd

THE ANTHROPOLOGIST

- Observe and take notes (do not interprete or judge)
- Pay attention to what you see and what you do not see
- Do not only capture what you observe but also what is talked about
- Develop customer emphathy as a critical mind-set
- Vary time of observation to be representative

DELIVERABLE FINAL TEAM ASSIGNMENT

Deliverables after this workshop for your Team Assignment 1 – slide deck (e.g. powerpoint presentation):

- Overview of team setup (strengths, assigned roles, and rules)
- Overview of the selected neighborhood and description of its main features/characteristics based on data
- Overview of consulted data bases and main conclusions
- Evidence of conducted interviews (at least 2 per team member) and main insights/conclusions from these interviews
- Evidence of anthropologist logbook (covering at least 6 hours of observation for the entire team) and main insights/conclusions from these observations
