Partnership Management

@TU/e innovation Space

Isabel de Haan

05.10.2026

Introduction

BEFORE: Country Manager Fiat Chrysler Capital & International Program Manager at DLL.

NOW: Business collaboration manager & Cluster lead at TU/e innovation Space

Why important?

- To access complementary expertise
- To turn collaboration into results
- To maximize mutual benefit
- To share risks and resources
- To build trust and long-term value
- To create more impact
- To accelerate innovation

Reach our goals

TU/e innovation Space

Goal

- Educate responsible engineers for the future who are prepared to take on important societal, technical and scientific challenges

TU/e innovation Space

In a nutshell

- Learning hub for **Challenge-Based Learning (CBL) and student entrepreneurship at TU/e**
- Center of expertise for education innovation
- **Open community** to exchange knowledge and develop responsible solutions to real world-challenges

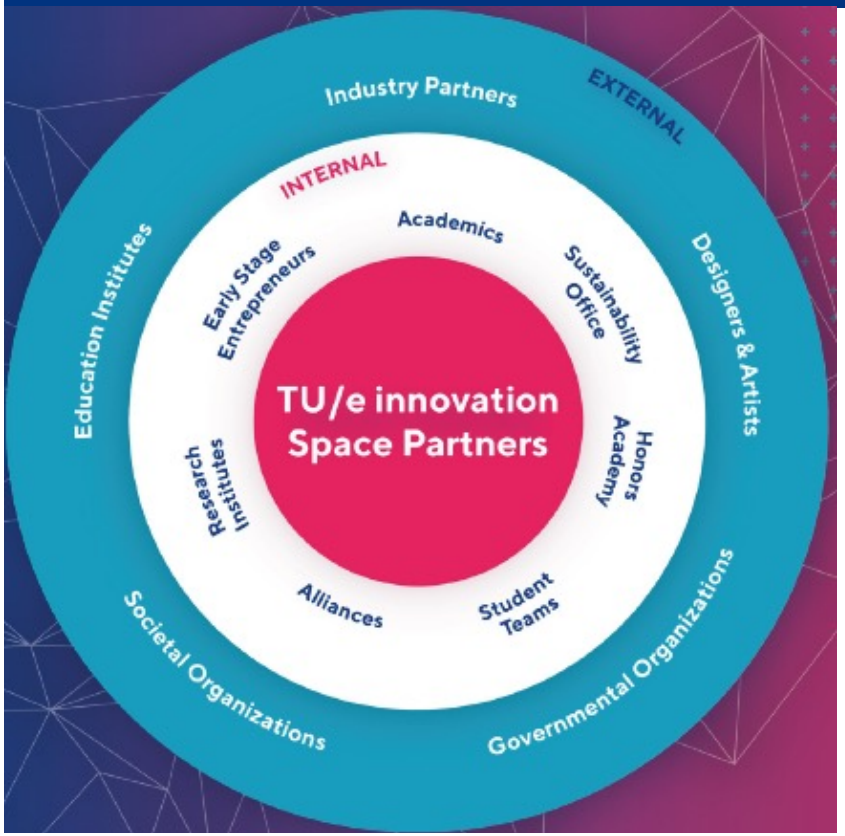

TU/e innovation Space

What is CBL?

- Multi or interdisciplinary groups
- **Real-world challenges provided by partners**
- Complex & open ended
- Hands-on learning by doing
- Prototyping

TU/e innovation Space Community

Partners Curricular:

- CBL courses: 35
- ASML hybrid teachers: 11

Partners extra-curricular:

- TU/e Contest: 27
- MKO: 29
- TU/e Student Teams: ~400

Organization types:

- Large Enterprise - 26%
- Knowledge Institutes - 26%
- Societal Institution - 20%
- SME - 19%
- Student teams - 5%
- Public Institutes - 4%

TU/e Contest 25/26 - Partners

Examples of Partnering Models

- 1. Strategic Alliance
- 2. Joint Venture
- 3. Co-Branding / Co-Marketing
- 4. Licensing / Franchising
- 5. Supplier Partnership
- 6. Innovation Partnership
- 7. Community / Ecosystem Partnership

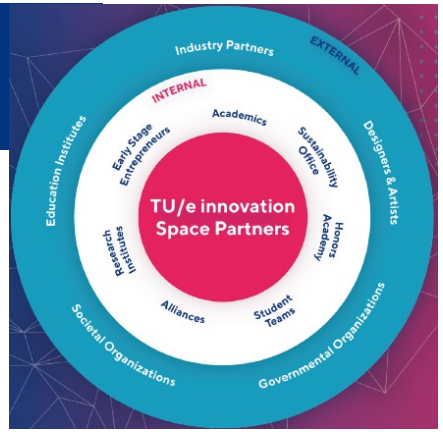

From contract-based structures to more agile, trust-driven collaborations

From formal alliances to ecosystem-based partnerships that prioritize adaptability and shared purpose

TU/e innovation Space envisioned model

Learning Innovation Community

Loosely Coordinated Network:

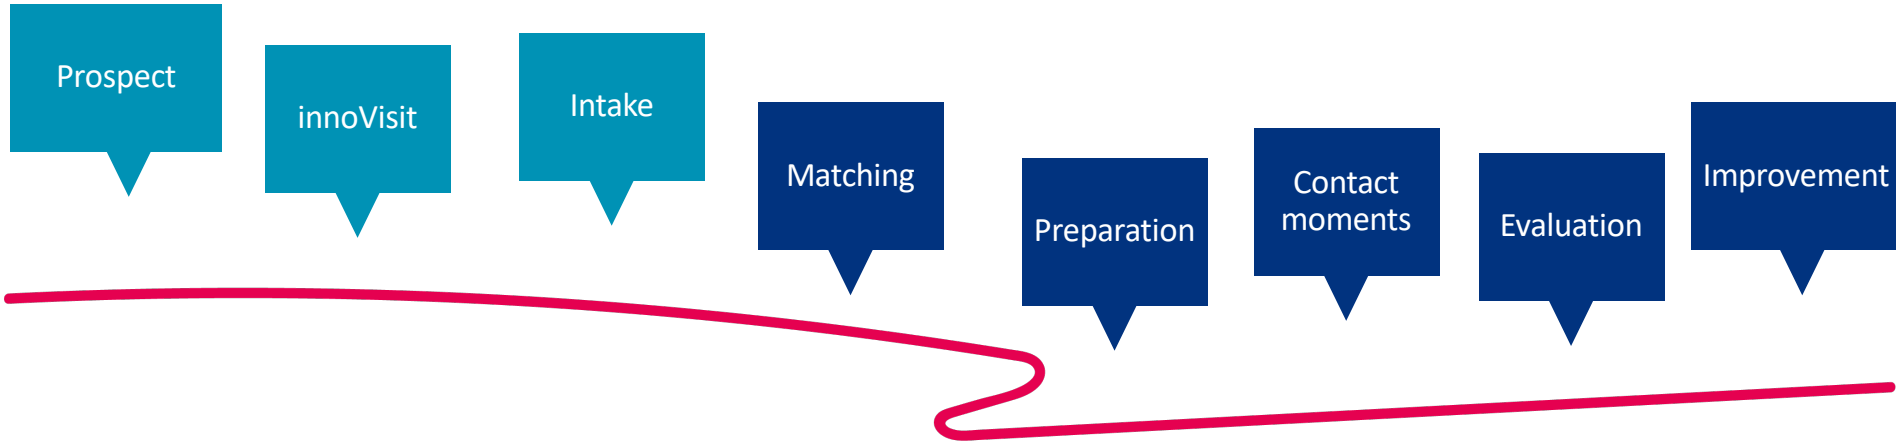

- Menu of activities of all partners
- Thematic Activities & Working Groups: Focused on CBL&EL, innovation, engineers of the future and domains like sustainability, AI, health tech, mobility
- Initiative-Based Leadership: Different partners take the lead on own initiatives.
- Soft Governance: Based on trust, shared purpose, and lightweight agreements.

How do we collaborate with (different type) partners

- Clear idea & explanation why we approach them
- Understand their goals, priorities, time & money availability
- Evidence how collaborating with us will support their goals
- Expectation management
- Personal contact

Process at a glance

What are the most important elements for a partnership?

- ....
- ....
- ....
- .....
- .....

What are the most important elements for a partnership?

Personal elements: enablers

- Personal contact and relationship building
- Trust
- Clear and open communication
- Mutual understanding
- Commitment and reliability

Organizational elements: structure

- Shared goals and vision
- Mutual value creation
- Clear roles and expectations
- Leadership support
- Resources and commitment
- Measurable outcomes and impact

TU/e Contest 2026
Partner
BOSCH
Thin Metal Technologies
Sparking Innovation Award
for engineering creativity and entrepreneurship
Sponsor amount € 2.500,–
and six months know how support tailored to fit
